1. Introduction

1-1 Outline

Games of the XXXII Olympiad (2020/Tokyo) and Tokyo 2020 Paralympic Games (“Tokyo 2020 Games”) will be held from 24 July ~ 9 August 2020 and 25 August ~ 6 September, 2020 respectively. Numerous radio equipment is expected to be utilized during the Tokyo 2020 Games for creation of TV videos, news reports, Games Timing and other Games operations.

The Tokyo of the Olympic and Paralympic Games (“Tokyo 2020”) will conduct Test & Tagging of radio equipment with the cooperation of the Ministry of Internal Affairs and Communications (“MIC”), which is the competent authority of radio spectrum supervision in Japan, to ensure smooth operation of Tokyo 2020 Games-related radio communications.

This newsletter (Test & Tagging Guide) will explain Test & Tagging required for the above radio environment. Users of all radio equipment (who received provisional approval) must pass the Test of the equipment and receive Tags before bringing them into Tokyo 2020 Games venues. Essentially, radio equipment brought in by overseas institution or individual cannot obtain permission to use radio frequencies in Japan, but approval of use can be obtained within a specific venue during Tokyo 2020 Games period by following the procedure for Test & Tagging explained in this newsletter.

1-2 Purpose

This Test & Tagging Guide is for the radio users during Tokyo 2020 Games at and around Games Venues, to explain procedures for Testing the provisionally approved equipment and receiving Tags, etc.

2. from Spectrum Application to Test & Tagging

When a user wishes to bring radio equipment into the venue, permission from Tokyo 2020 must be obtained beforehand. Operation of the radio equipment requires Japanese licence. The procedure is shown in the flowchart below.

① application submission ~ application accepted ~ frequency coordination ~ notification of allocated frequency ~ provisional approval issued
② provisional approval issued ~ Testing of equipment ~ Tagging of equipment ~ equipment approved for use
③ equipment approved for use ~ equipment ready for use at venue

All approved equipment that went through this procedure will receive Tag from Tokyo 2020. Any equipment without a Tag cannot be brought into the venue.

This document will explain the procedure indicated as ② in the diagram below. ※See 「3. Test & Tagging procedure」 for more information.

Please refer to the following URL for part ① of the above flow explained in the Spectrum Application Guide.

3. Test & Tagging procedure

3-1 General procedure

(1) Coordination of Test & Tagging date/time/place

Tokyo 2020 will contact users to coordinate the date/time/place of Test & Tagging.

(2) Notification of Provisional Approval (Provisional Approval Letter) issued

After the Date/Time/Place of Test & Tagging is coordinated and decided, Tokyo 2020 will send the Provisional Approval.

This Provisional Approval Letter is required to undergo the Test & Tagging. Please fill in your contact address in Japan and other required information and bring the Letter along with the radio device to be tested to Spectrum Desk.

(3) Testing the radio equipment

• User will check the content of the Provisional Approval letter and come to the designated place on designated date/time for Test & Tagging.
  ※ Test & Tagging will be done at the Spectrum Desk.
• User will present ① Provisional Approval letter, and ② radio device to be tested, at the reception and register for Test & Tagging.
• User will then undergo Test conducted by MIC, following instructions from Tokyo 2020. User may be asked to operate the radio device when instructed by MIC inspector.
  • Inspector will make “pass” or “fail” judgement when the Test is finished.

(4) Tagging the radio equipment

• Tokyo 2020 will attach “Approved” tag to the device that received a “pass”.
  • If the device receives a “fail”, “DO NOT USE” tag will be attached and the device will be banned from being used.

(5) Approval for use

• Tokyo 2020 will hand the user the ① Approval Letter (which acknowledges the use of radio device set at the approved frequency), ② device with “Approved” tag, as well as important reminder about using radio devices in Japan, thus approve the use of radio equipment at the venue, etc.
3-2 Special cases

When the volume of provisionally approved equipment is too big, or when they are already installed in place due to schedule reasons, or when they are too large or unmovable, Tokyo 2020 will coordinate the inspection method with the user. Please contact us by email.

3-3 Procedure for Japanese-licenced equipment

Even when the equipment already have Japanese license, as long as they are going to be used in the Tokyo 2020 venue, make sure the user follows the procedures related to the approval of the wireless device such as “Frequency Application” designated by the Tokyo 2020.

The radio equipment Test or the measurement to confirm performance of the device may be skipped if the user is able to produce the following documents on the Japanese-licenced equipment;

① photocopy of certificate for a radio station license or registration certificate (which clearly indicates the number of devices)

② photocopy of Radio Station Particulars List (which clearly indicates the number of devices)

3-4 Contact

For inquiries regarding Test & Tagging, contact
testandtag@tokyo2020.jp
4. Spectrum Desk

Spectrum Desk will be situated in the facility of IBC, MPC, OV, UAC. At other competition venues such as OLS, Spectrum Desk will be placed outside the security gate. Please refer to the following chart for venues that will have Spectrum Desk.

venues in (IBC, MPC, OV, UAC, OLS) : serviced throughout the Games time
other venues: open for a limited period

Services at IBC, MPC, UAC and OLS start from 2 weeks prior to the opening of the Tokyo 2020 Games, at OV/PV start on the village opening day, all until the day of closing ceremony. Extension of service period at IBC and MPC, etc. is being considered.

All other venues will be serviced from 4 days prior to the 1st competition for Olympic Games, from 3 days prior to the 1st competition for Paralympic Games, all until the day of the competition.

Details of the service period and hours will be announced separately in newsletter and Tokyo 2020 website. (approximately by the end of March 2020)
5. **Important notes**

(1) Please make sure the equipment brought to the inspection are set at the allocated frequency indicated on the letter of provisional approval. Otherwise, the device will “fail” the Test. Therefore, some devices may have to be adjusted correctly before leaving the country.

(2) Channels that can be used by Wi-Fi and other wireless LAN (Wi-Fi) devices are part of the 5 GHz band (please refer to Table 2.7 Frequency bands for license-exempt wireless LAN in Section 2.7 of the Spectrum Management Plan). Please note that if the channel is not set at the frequency approved in the letter of provisional approval, it will “fail” the Test.

(3) Test & Tagging are by reservation only. Be sure to keep the appointment. It may not be possible to undergo Test & Tagging otherwise.

6. **Others**

(1) Under Japanese Radio Act, all users must get licenced in order to operate radios in Japan. Any violation is punishable by law; imprisonment for a period not exceeding 1 year, or a fine not exceeding 1 million yen. It is also punishable by Radio Act if the unlicenced radio interferes with other radio.

(2) Tokyo 2020 will conduct radio spectrum monitoring with the cooperation of the MIC, the competent authority of radio spectrum supervision in Japan, in
order to ensure that radio system used for the Tokyo 2020 Games is not interfered or obstructed, and appropriately used.

(3) In the host city of Tokyo, centre of Japanese economic activities where many radio waves are used, radio frequency is very congested. Please minimize the use of radio in order to prevent interference.

(4) Users from Japan, except for Tokyo 2020, who bring Japanese radio equipment are requested to come to the Test & Tagging site after obtaining a Japanese radio station license, including registration, etc. on their own.

◆ FAQ (Frequently Asked Questions)

Q1: Can I use radio equipment in Tokyo 2020 Games venues and their attached facilities during Tokyo 2020 Games period?
A1 : Yes, but only at the designated places where the equipment was approved for.
        Please try to limit the use of radio equipment to only situations that have no other alternatives.

Q2 : I have a Japanese radio station licence. Do I still need to apply for radio frequency use?
A2 : Even if the equipment has Japanese licence, as long as you wish to use them at Tokyo 2020 Games venues, please follow the procedures such as “Frequency Application” designated by the Tokyo 2020, just as the above section 3-3, Procedure for Japanese-licenced equipment states.

Q3: Do I have to submit the Spectrum Application for "receive only" and "IP wireless" device and take the test, too?
A3: It is not necessary to submit the Spectrum Application or take the test. However, it is strongly recommended to attach a "receive only" tag on your device to bring in the device smoothly at the entrance of the venue. You can get the "receive only" tag at any Spectrum Desk in the venues shown in “4. Spectrum Desk” section.
Q4: What is the situation with satellite communications during Tokyo 2020 Games?
A4: Services provided by Japanese telecom carriers are available.

Q5: We are planning to operate cellular backpack cameras (LIVE-U/TVU, etc.) that operate on mobile phone line at Tokyo 2020 Games venues. Is it necessary to request approval for this kind of devices?
A5: There is no need for frequency application and carry-in approval procedures. However, it is recommended to attach a tag so as to make the process of Equipment Entry Regulations at the entrance of each venue go more smoothly. You can receive tag for your device at Spectrum Desk. Spectrum Application is required for equipment with Wi-Fi Access Point function.

Q6: How much does it cost to apply for radio frequencies and undergo Test & tagging?
A6: There are no associated costs for spectrum use during Tokyo 2020 Olympic and Paralympic Games.

Q7: Where can I find documents on Tokyo 2020 Spectrum?
A7: We have prepared following documents;
- Spectrum Management Plan
- Spectrum Application Guide

Q8: Can I apply for multiple venues as one area, like “Venue cluster” or “All venues”, on spectrum application form?
A8: No. It is not possible to apply for “all venues” as one area. You are required to apply for each venue.

Q9: There is no notes/comments field on the Spectrum Portal and Spreadsheet Forms. Where can I write notes or comments on specific requirements?
A9 : Notes or comments can be written under Applicant’s Remarks in English.

Q10 : How do I apply for radio frequency during Games time?
A10 : Due to the number of applications already received, it takes time to allocate available frequencies. It is recommended that you apply for a frequency before the Tokyo 2020 Games period.

Q11 : Can I get my equipment tested and tagged without appointment?
A11 : It is possible but priority will be given to users who made reservation. We recommend that appointments are made especially when the Spectrum Desk may be crowded.

Q12 : What can I do if there is a large number of radio equipment, or if they are too big, or became difficult to undergo Test & Tagging at a designated spectrum desk due to installation schedule?
A12 : Please contact testandtag@tokyo2020.jp to inquire about the inspection schedule/method (by roaming team, etc).

Q13 : Can identical devices be brought into venues without undergoing Test & Tagging if one device is already approved?
A13 : Approval is given to every one of the radio devices and Tag is attached to each one of them. No device can be brought into venue without Test & Tagging.

Q14 : Would I violate the Radio Act if a Tag of approval is not attached to the device I use in the venue?
A14 : Even if the “Approved” Tag has been issued through the approval process by the Tokyo 2020, it will be regarded as an unapproved device unless the tag is attached on its body. Such device cannot be brought into the venue.

If the wireless device has not gone through the obligatory approval procedure, it is in violation of the Radio Act and may be punished by law.
Q15 : If I lost the approval Tag, how can I have it reissued?
A15 : Please contact the Spectrum Desk at your nearby venue.

Q15-1: If I lose the approval Tag at a venue, is there a number I can call?
A15-1: We do not accept requests by phone.

Q15-2: What is the actual procedure for re-issuance of a Tag?
A15-2: Please bring your Approval Letter and the equipment to the Spectrum Desk and have your Tag re-issued.

Q16 : Will radio frequency be monitored during major test events and Tokyo 2020 Games period?
A16 : All radio frequency will be monitored at all venues by MIC.

Q17 : Where should I make inquiries about Test & Tagging?
A17 : The contact for Test & Tagging inquiries is;
    testandtag@tokyo2020.jp
