

PARALYMPIAN

GOO CHOKI PAR (Graphic Designer)

Moving forward. Human aspiration for ceaseless progress removes physical limits, removes handicaps and leaps over the boundaries of nationalities and gender. Each life living in the present in 2020—I wanted to capture all of them, equally, in their beautiful and iconic shapes. The work's main motif is an individual who moves forward. Arms swinging boldly, feet hitting the ground with full force. This primitive embodiment of movement represents the determination of all Paralympians trying to move forward toward a surer future. The work pays homage to what each and every athlete has achieved, and to the history of human endeavor and progress.
